

Explanation of CMHS NOMS Codebook Elements for combined new NOMs tool

Note: This CMHS NOMS Codebook is being released to aid grantees in understanding the new tool and in transitioning their own systems and practices to accommodate the new tool. While the codebook is as accurate as we can make it at this time, there may be changes required as the new NOMS tool is finalized and tested in the SPARS system. While we expect any such changes to be minor, please watch for updates to this codebook in the future.

Overview: This CMHS NOMS Codebook contains information about the fields available for batch upload and data download for the new NOMS tool used for client-level interviews from 12/10/2022 and forward. Grantees should refer to the previous iteration of the adult and child codebooks for the expired adult and child tool records. This codebook should only be used for the combined new NOMs tool.

Codebook columns: Columns A and B indicate if a particular row/field is used for batch upload and/or appears in data download. Grantees should filter based on these columns to determine all the fields needed for batch upload and all the fields to expect in a data download.

Column C indicates the section of the tool that particular row/field appears in the NOMs tool.

Column D indicates the question number that particular row/field appears as in the NOMs tool.

Column E indicates the question text that particular row/field appears as in the NOMs tool.

Column F indicates the possible responses as it appears in the NOMs tool (English version).

Column G indicates data type for that particular row/field.

Column H indicates the field name that should be used for batch upload and the name that appears in data download for questions related to the new NOMs tool. Note that not all field names appear in the tool as some are system derived.

Columns I and J should be referenced to determine the valid values that can be used for batch upload and the valid values to expect when viewing a data download file.

Column K indicates additional notes related to warnings, skip logic, and conditions for that particular row/field.

Codebook rows: There is a row in the codebook for every field that will appear in the data download, or is used to batch upload data, for the new NOMs tool. Downloads for expired adult tool data or child tool data should use the previous versions of the CMHS NOMs codebooks for those tools.

CMHS NOMS Fields Codebook Version 5/9/2023

| Batch Upload Field | Data Download Field | Tool Section | Question Number | Question or Description | Response | Data Type |
|--------------------|---------------------|-------------------|-----------------|--------------------------|---|-----------|
| Yes | Yes | Record Management | N/A | Client ID | | Text(11) |
| Yes | Yes | Record Management | N/A | Grant ID | | Text(20) |

Change Log

| Update Version Date | Description of changed item(s) |
|---------------------|--|
| 5/9/2023 | Removed all fields with a "Edit-Retire: Old Field" or "Dropped" Change type |
| 5/9/2023 | Removed columns with information related to the old adult and child tools |
| 5/9/2023 | Added a new column named " Upload Field " that indicates if the particular field in column I is used for batch upload |
| 5/9/2023 | Added a new column named " Data Download Field " that indicates if the particular field in column I is used in data download |
| 5/9/2023 | Renamed column header from " New Value Definitions " to " =Value Definitions (Batch Upload) ". This column indicates all the valid values that can be used for batch upload. |
| 5/9/2023 | Added a new column named " Value Definitions (Data Download) " that indicates all the valid values that could appear in data download |
| 5/9/2023 | For Sections A - F, indicated that -1 value is not valid for data entry and is for data download purposes only. |
| 5/9/2023 | Clarified date definitions and codebook warnings/logic for all date fields |
| 5/9/2023 | Added new Program data download only field name |
| 5/9/2023 | Added new Cohort data download only field name |
| 5/9/2023 | Removed N/A and Not Previously asked in NOMs values |
| 5/9/2023 | Added conditions as to when N/A can be used for batch upload and that any edits to this field must meet age limits set by the ClientType field |
| 5/9/2023 | Corrected skip logic for the many assessment types and interview combinations |
| 5/9/2023 | Added logic indicating the minimum and maximum ages for an adult or child client respectively |
| 5/9/2023 | Corrected logic that question is only applicable if ClientType = 1 |
| 5/9/2023 | Added FFY data download only field name |
| 5/9/2023 | Added Quarter data download only field name |
| 5/9/2023 | Added Month data download only field name |
| 5/9/2023 | Added Record Status data download only field name |
| 5/9/2023 | Clarified that these fields always applies. Clarified which values are valid based on diagnosis category (Substance Use Disorder or Mental Health) and that a value cannot be used more than once across the three Diagnosis fields. |
| 5/9/2023 | Added -11 as a valid value if user selects "No Code Assigned To This Client" for DiagnosisOne, DiagnosisTwo, or DiagnosisThree . Removed -1 as a valid value since this is always required now. |
| 5/9/2023 | Clarified logic of when this question should be answered |
| 5/9/2023 | Updated logic to allow -1 be a valid value only if RespondentType = 2 |
| 5/9/2023 | Updated logic to allow -1 be a valid value only if RespondentType = 2 |
